

YMV is proud to announce that: YMV expanded Propulsion Systems Division by the cooperation with Milper Propeller Technologies Inc. on September 1, 2017.

YMV is currently a leader manufacturer in Marine Crane, Winch and Propulsion Systems including production of Bow, Stern, Tunnel Thrusters, while Milper's expertise lies in design and development of marine propeller and shaft pairs, including both Fixed and Controllable Pitch Propellers (FPPs and CPPs). **The merger has come about in order to production of Propulsion Systems domestically with advanced technology under YMV production experience.**

YMV's and Milper's strengths are highly complementary to each other.

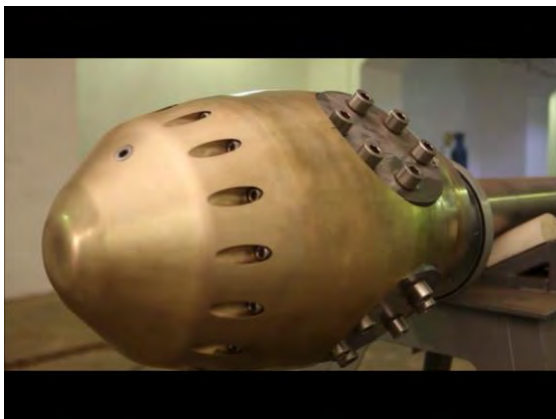

“YMV,

with its experience on
Propulsion Systems, will
bring into action

Milper’s R&D projects that
meet the needs of

Defense and Shipbuilding
Industry.”

Milper was providing advanced engineering packages, such as Finite Element Analysis (FEA) and Computational Fluid Dynamics (CFD) tools, in addition to the company-owned proprietary applications.

YMV Milper

will focus on production of propeller and shaft pairs that meet the highest international standards; such as ISO, Class Certifications, and Military Standards.

Do you need custom made solutions for your shipbuilding projects; just call our Sales Team.
